

## ALIEN SPECIES IN FOREST ECOLOGY, 3 ECTS

Alien trees at the WULS-SGGW Forest Experimental Station in Rogów. Photo by M. Brach.

- Can alien trees help mitigate the negative effects of climate change?
- What silviculture and management methods prove effective for aliens?
- What benefits and risks do aliens pose?

Join us for an Erasmus International Blended Intensive Program on Alien Species in Forest Ecology held in Rogów, Central Poland, from 14 - 19 June 2026.

This programme offers a blend of online and onsite activities, including lectures, workshops, excursions, field visits, and Oxford-style debates.
